Collaborate with the CODESYS
This product features the CODESYS* Soft PLC. CODESYS is a device-independent-PLC-programming system that is complied with the IEC 61131-3 standard and supports all standard programming languages such as ST and LD.

Along with Modbus TCP Master
Modbus is a communication protocol widely applied in the industrial field. Data collecting and controlling can be carried out with Modbus TCP Slave compliant devices.

Together with OPC-UA Server
OPC UA (Unified Architecture) is an advanced model of OPC specifications, which features refined capability of transmitting and receiving semantic description data. OPC-UA is a platform independent standard based on TCP. The product can be operated with HMI and SCADA software that are provided from differing makers and applicable to OPC-UA client.

Configurative modules
You can set the modules as you desire up to 16 modules. The total current consumption of the configurative modules should be less than 3.3A.

No base board required.
This product does not require a base board to install or connect. It helps set and remove the module(s) easily and smoothly.

Optocoupler Isolation Input (Compatible with current sink output) and semiconductor relay output
The product has the switchable four channels of Optocoupler Isolation Input (Compatible with current sink output) and semiconductor relay output. It is usable for external switch inputting or LED lighting.

Max. 115,200bps RS-232C Serial Communication
The Product has one RS-232C-standard serial port. Baud rates from 300 to 115,200 bps can be set.

Compact Design
Compact design, 44.7 (W) ×94.7 (D) ×124.8 (H) mm, features flexibility in installation.

Adaptable to a wide range of temperature between -20 and +60℃
The product is capable of operating in the temperature between -20 and + 60℃. It can be installed in the various environments.

A powerful running platform without fan
The product contains the ARMRCortexR-A8 processor (600MHz) and the DDR3 512MB system memory.

Decrease malfunctions or damages by bus isolation and surge protection. (Digital input/output)
Electrical isolation between the digital input/output and CPU can block up the electrical noise flow.

Installation easy with two pieces of terminal support and DIN rail
You can remove a terminal connector without a screwdriver so that it can shorten the time of the replacement. As the product is mounted on the DIN rail, removing and replacing are easy as well.

Equipped with the LED for an operation check
The product has the LED for an operation check, which helps you visually confirm the communication status of each interface.

No electrolytic capacitor
Without an electrolytic capacitor, which has a limited life, we are creating the product with a longer life.
